

MRI Brain Plain

MRI – Brain

Shadia Osman Abdalgafar Elsaim

31 May 2016

Type	MRI
Body Area	Brain
Date	31 May 2016
Facility	Continental Hospitals, Hyderabad
Doctor	Dr. Kishore LT

Findings

1. Cisternal spaces and ventricular system are prominent for the age.
2. Cerebellum and brain stem and cerebral parenchyma show multifocal tiny areas of old microhemorrhages and ischemic lesions.
3. No fresh infarcts / haemorrhage.
4. No shift of midline structures.
5. No extra axial collection.
6. Sellar and parasellar regions are normal.
7. Internal auditory canals, inner ear, mastoid antra are normal.
8. Cranio vertebral junction is normal.
9. MRA is within normal limits.
10. No fresh lesions seen.

Impression

Mild cerebral atrophy with old microhemorrhages and ischemic lesions – sequelae of old trauma.
