

# Imaging Report

Mammography – Right Breast

Shadia Osman Abdalgafar Elsaim

14 Feb 2026

Type	Mammography
Body Area	Right Breast
Date	14 Feb 2026
Facility	Alfascan Imaging Center

## Findings

Scattered densities. Multiple scattered calcified and non-calcified lesions. No spiculated masses. Right supra-areolar hypoechoic lesion. Mild mammary fibroadenosis.

## Conclusion

**BIRADS 3 (stable from Feb 2025). Half-annual screening recommended. Multiple probably benign lesions – likely fat necrosis.**

BIRADS 3
